

# PUMPTEC

# 1010

## The 1010 Offers:

- **Compact Size**
- **Quiet**
- **High-Efficiency**
- **High-Pressure**
- **Long Life**
- **Unique Design**

## Performance and Reliability in a Compact & Quiet Design

Features

### COMPACT & QUIET

The unique direct-mount design of the 1010 allows use in small enclosures and smaller size motors. Efficient design and quality construction results in a quiet pump that can be used in noise-sensitive environments.

### QUALITY MATERIALS

Our unique brass inlet manifold provides corrosion resistance and durability for extended running. Stainless steel plungers and valves will not peel or crack from chemical or excessive thermal exposure.

### UNIQUE DESIGN

The inlet manifold can be positioned for convenient installation into small enclosures. 1/4" and 3/8" discharge ports concentrate plumbing and avoid the use of excess fittings. Easy access valve cover with one tool required for fluid end service. Manifold can be orientated to suit enclosure and plumbing requirements.

Specifications

### Specifications

Flow	0 - 1 GPM
Pressure	0 - 1000 PSI
Temperature	40 - 140°F
RPM	100 - 1800
Inlets	1/2" FNPT
Outlets	3/8" and 1/4" FNPT
Seals	V-packing

### Materials of construction

Manifold	Brass
Plunger	Stainless Steel
Valves	Stainless Steel
Seals	Textile/NBR
O-Rings	NBR

### Available Motor Voltages

120 VAC  
230 VAC (50/60 Hz)
