

Why Upgrade?

Pumptec's engineered pumping systems power the majority of high performance extractors on the market. Pumptec's Upgrade Kits feature the industry standard pumps for these performance levels. Don't deny yourself the opportunity to upgrade your equipment to a more effective cleaning machine.

Benefits of Pumptec's Upgrade Kits:

- **Higher pressure systems provide greater agitation for better cleaning with less effort from the operator**
- **Lower flow rates maximize the effect of a heater and do not over wet the carpet**
- **Hotter chemicals clean better at higher pressure**
- **Assembled and tested Upgrade Kits ready to install — installation in less than an hour**
