

Power Box™ Remote Control

- **Convenient Mounting**
- **Simple Installation**
- **Durable Stainless Steel**
- **Reliable Components**
- **Affordable**
- **Selection**
- **Custom Order**

Protect your 12 VDC system from overload

- **CONVENIENT**

Mount your control anywhere it is convenient for you. Mount on any surface, vertical or horizontal, with fasteners or Velcro™.

- **SIMPLE**

Simply connect red to (+), black to (-) on motor and battery and you are ready to go. To further simplify your installation we have optional Anderson™ connectors for "plug and play" simplicity.

- **DURABLE**

The durable stainless steel housing protects all electrical connections, switches, meters, solenoids and circuit breakers. Housing is weather resistant, but not weather proof, and must be kept out of direct water spray.

- **RELIABLE**

The Power Box is built for rugged commercial use. Choose 75 amp push/pull switch or 100 amp starter solenoid (activated by toggle switch) for high amperage applications. Choose either an instrument quality or automotive quality ammeter.

- **AFFORDABLE**

The Power Box pays for itself in labor savings alone. Imagine the time it would take to find all of these performance matched components.

- **SELECTION**

Select from four standard models.

- **CUSTOM ORDER**

Custom order the exact components and configuration for your OEM application.

Select from four standard models

Model	Part no.	Amperage	Switch	Ammeter	Breaker
Power Box 30	80573	30	Push/Pull	Automotive	30 AMP
Power Box 40	80574	40	Push/Pull	Instrument	40 AMP
Power Box 50	80578	50	Solenoid	Instrument	50 AMP
Power Box 60	80579	60	Solenoid	Automotive	60 AMP
