

Durability

"I have 1800 hours on this pump, I have done no maintenance, it still performs perfectly...remarkable." - Gary Tank, President Buffalo Exterminating, Orchard park, NY

Simplicity

A pump you don't simply throw away...you simply fix it.

Removing and replacing a "throw away" pump probably takes more time than the five minutes that it takes to renew our pump.

The two winners tied with a time of 4:57 and each won a complete 200 PSI system. Imagine less than five minutes to remove pump from motor, disassemble, remove and replace all wear parts, replace pump onto motor and fasten bolts; all with a hex wrench.

How fast could you renew your pump? – Our winners tied!...less than 5 minutes!
