

# PUMPTEC

WHERE INNOVATION FLOWS

Engineered for

High Reliability

and Precise

Control

Pumptec delivers higher reliability than current commercial laundry chemical pump technologies.

## Chemical injection applications require high reliability and precise flow control.

That's why Pumptec designs custom high-pressure pumps for reliable performance in chemical injection systems. Our engineering expertise ensures precise dosing for such industries as commercial laundry, fertigation/irrigation systems, and oil and gas lines.

With Pumptec custom pumps, you can expect:

- Compact, low amperage draw pumps
- Cost-saving designs that provide durable, efficient, and low-maintenance operation
- Chemical-resistant materials to withstand harsh chemicals.

Many of our solutions target performance and design issues users have encountered with other pumps in the market.

In commercial laundries, our pumps are proven to outlast existing dispensing system pumps with higher reliability, maintenance-free operation and the precise flow control required for cleaning chemical dosing. For the injection of fertilizers, acids, soil amendments, and other water-soluble products into an irrigation system, our pumps are perfect for fertigation or chemigation systems. With operations up to 90 GPH, our pumps deliver accurate injection rates, maximum dependability and long-term reliability. In the oil and gas production process, our high-efficiency pumps are used to inject chemicals to keep gas lines clear. Our efficient design also offers a low average amperage draw, making it an excellent choice for solar-powered chemical injection systems.

For your chemical injection pump needs, we can engineer a solution for you.

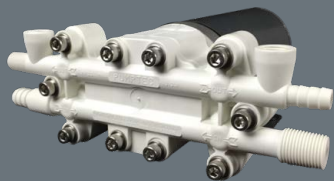

**Pumptec Advantages**  
 Pumptec designs reliable low flow, high-pressure plunger-style pumps and pump systems, precisely engineered to meet your exact performance specifications.

- Precise flow rates with consistent pressure at the nozzle
- Compact, efficient, electric-powered pumps
- Rugged, chemical-resistant, durable construction
- Long-life, low-maintenance, serviceable design
- Personalized service and support.

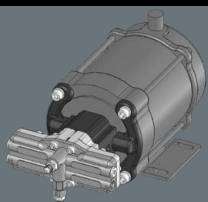

# Pumptec Pumps provide durable, reliable and affordable performance for a wide range of chemical injection applications.

Model 114C Acid Pump

Model 119C

**Provides durable, chemical-resistant operation in a compact design.**

<b>Pressure</b>	50 PSI	<b>Body</b>	Chemical Resistant Poly
<b>Flow</b>	90 GPH	<b>Seals</b>	Viton
<b>Ports</b>	Vertical or Horizontal	<b>Plunger</b>	Ceramic
<b>Dimensions</b>	8.63" L x 8.06" W x 3.79" H	<b>Power</b>	12V

**Provides chemical and corrosion resistant operation for use in extreme conditions.**

<b>Pressure</b>	Up to 3000 PSI	<b>Body</b>	Stainless Steel
<b>Flow</b>	6 GPH	<b>Plunger</b>	Ceramic
<b>Dimensions</b>	13.72" L x 6.63" W x 7.28" H	<b>Power</b>	12V

700 McKinley Street NW  
Anoka, Minnesota 55303  
763.433.0303
